GET A GRIP! AT THE FLIP OF A SWITCH WITH ONSPOT AUTOMATIC TIRE CHAIN SYSTEM

Get an instant grip on all slippery surfaces at the flip of a switch and be prepared for the upcoming winter with the ONSPOT Automatic Tire Chain System for 1/2 ton to Class 8 vehicles. The ONSPOT

Automatic Tire Chain System offers the traction of a single set of conventional snow chains at the touch of a button, without having to stop the vehicle. The ONSPOT is bolted to the vehicle's rear suspension, and consists of a mounting bracket, air cylinder, swing arm, and chainwheel. Activate the ONSPOT and friction between the tire and rubber-covered chainwheel will cause the chainwheel to rotate, creating enough centrifugal force to flail the chains out in front of the tire. The traction from the chainwheel is obtained in forward or reverse. ONSPOT Automatic Tire Chains are used for school buses, fire trucks, utility trucks, ambulances, and tractor trailers.

A contract for the Automatic Tire Chain System was awarded to ONSPOT of North America under Federal Supply Schedule 23V, SIN 272-105, New Technology.

Send orders directly to the contractor:

ONSPOT of North America, Inc.
1075 Rodgers Park Dr.
North Vernon, IN 47265
Contact: Patrick Freyer
Phone: (800) 766-7768

"PINMASTER" THE SAFE, QUICK & EASY WAY TO CHANGE BUCKET TEETH

Finally, a tool made for safely changing excavator and backhoe bucket teeth. For over 20 years changing bucket teeth has been aggravating and dangerous. Davom Products, Inc., of Tempe, AZ, has developed a patented tool that makes changing bucket teeth safer and faster.

The PIN MASTER removes and installs teeth from backhoe buckets and excavators in a matter of minutes. The tool is designed so that the flex pins are not destroyed and can be reused many times! The tool pays for itself just in pin savings alone. It puts an end to hammering on bent punches and vice grips. The PIN MASTER tool comes in five different models.

A contract for the PIN MASTER was awarded to Davom Products, Inc., of Tempe, AZ, under Federal Supply Schedule 23 V, SIN 272-105 New Technology.
